

Report on the loan portfolio

August 2025

CONTENT

Effect of the economic environment on the loan portfolio	3	
Information on the Retail Private portfolio	6	
Information on the Corporate/SME portfolio	9	
Information on the Real Estate portfolio	12	

Effects of the economic environment on the loan portfolio (1/2)

The following general market developments can be observed in the three main customer risk segments of the Association of Volksbanks:

Retail Private:

- The private customers loan portfolio remains stable, default rates are low
- Significant increase in lending in the first half of 2025 the Association's production of new private residential mortgage loans has more than doubled compared with H1 2024, reaching roughly the same level as before the introduction of KIM-VO¹⁾

Corporate/SME:

- The weak economic development continues, and forecasts for 2025 have been revised downward. The subdued economic environment has a clear impact on companies currently in particular on the export-oriented industry which are further burdened by uncertainties (e.g. tariff discussions)
- In the first half year 2025, the number of insolvencies in Austria rose further from an already high level (+6%), the construction, retail and accommodation/gastronomy sectors were particularly affected

Real Estate:

- Increased demand for private residential mortgage loans has not yet led to a noticeable recovery in the commercial real estate market, but, with a certain delay, is expected to lead to an improvement, presumably from 2026 onwards
- High construction costs are still weighing on the market (completion forecasts for new buildings have been revised downward), and realisation periods (completion and sale of projects) have lengthened, mainly in the Eastern parts of Austria, i.e. in the region of Vienna
- Continued strong rental demand and rise in rental prices

Effects of the economic environment on the loan portfolio (2/2)

- · Specific loan portfolios of the Association of Volksbanks are affected to different degrees by the current economic environment
- KRIs in the **Retail Private** risk segment remain at good levels, they are low and stable.
- The **Corporate/SME** segment was stable compared to the previous year, with higher NPL ratios in particular in the accommodation/gastronomy, retail and manufacturing sectors
- Real Estate (i.e. commercial real estate financing) is the risk segment showing the most significant impact on asset quality, in particular in the area of real estate developers
- The distortions on the domestic real estate market triggered by high inflation, rising construction costs, high interest rates and a generally weak economic
 environment led to above-average total risk costs and an increase in non-performing loans
- As of 30 June 2025, the Association's total risk costs including PMAs were EUR 67 mn (Volksbank Wien: EUR 15 mn), and the Association's NPL volume increased slightly from EUR 1,362 mn to an amount of EUR 1,443 mn (Volksbank Wien: from EUR 455 mn to EUR 485 mn) in the first half of 2025
- Within the RE risk segment, the sub-portfolios of category B (residential real estate; total exposure of EUR 3.3 bn), category C (retail and commercial real
 estate; EUR 2.5 bn) and category "other" (holding companies and loans not directly attributable to other categories; EUR 0.5 bn) are affected
- Within these categories, real estate developers (purchase of land or properties, their development or renovation and subsequent profitable sale) are most
 affected by the above-mentioned distortions (regulatory so-called projects for sale; exposure of EUR 1.3 bn; largest share of category B residential real
 estate)
- There are no NPLs in category A (social housing and owner/developer schemes; exposure of EUR 1.5 bn)

- The Retail Private segment consists primarily of private residential mortgages
- Clear increase of exposure in the first half year 2025 of +3.7%, compared to 0.0% in 2024 and -4.1% in 2023
- NPLs in the Retail Private segment remain very low, borrowers have sufficient buffer for repayment and set priorities for expenditure

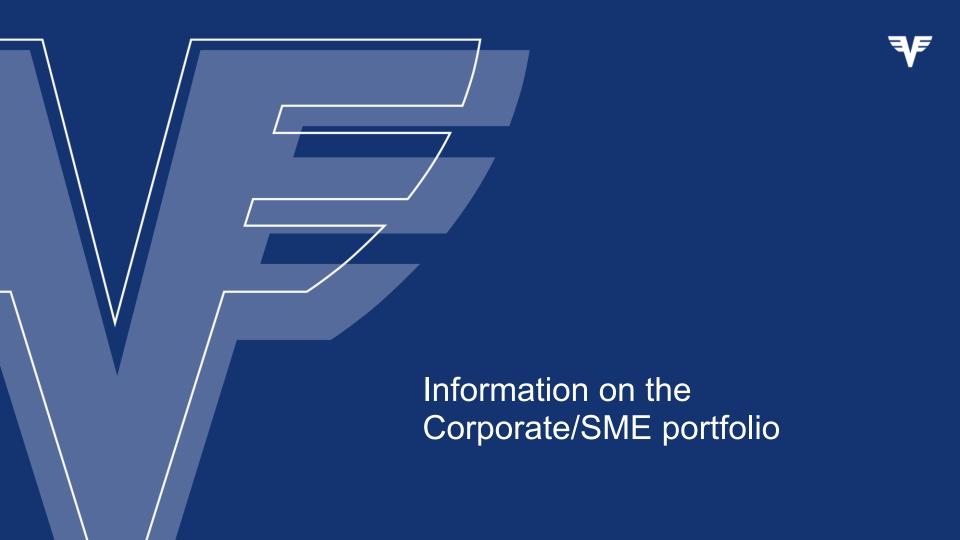

Regional distribution Retail Private segment

Segment	EUR million	Customer exposure 06/2025
Retail Private		9,807.9
Austria		9,473.0
Lower Austria		2,341.9
Upper Austria		1,251.1
Tyrol		1,155.9
Styria		1,182.4
Vienna		1,000.9
Vorarlberg		931.6
Carinthia		697.0
Salzburg		684.4
Burgenland		226.1
n.a.		1.6
Foreign countries		334.9
Germany		224.6
Netherlands		39.4
Switzerland		29.3
Other		41.5

 96.6% of the Retail Private portfolio is located in Austria, foreign customers are primarily from Germany (in which case the financed properties are also predominantly in Austria)

Avg. EL (perf.) 2025		0.2%	0.1%
Stage 2 (perf.) 2025		40.5%	33.0%
Stage 2 (peri.) 2023			

- The NPL ratio on the level of the Association's total portfolio of 5.2% as of 06/2025 results from the default of large-volume exposures in the Real Estate segment (reflected in a NPL ratio of 10.1% in the RE segment)
- Slight decline of exposure in the Real Estate segment due to the development of residential RE, as well as retail and commercial RE in the first half of 2025
- The RE segment's average PD (performing) of 1.9% and forbearance ratio of 9.7% exceed the total exposure's average ratios, primarily due to concessions made and to the deterioration of ratings following delayed payments (sales proceeds and/or rental income) from real estate projects

- Further strong growth in sub-category A (social housing, owner/developer schemes) in H1 2025, whereas sub-category C (commercial real estate) and sub-category B (residential real estate) show a negative development
- With respect to ratios, sub-category A stands out, despite the current crisis of the Austrian real estate market, it still has excellent risk indicators - no NPLs, forbearance ratio of 0.6% and avg. PD of 0.4%
- Sub-category B (residential real estate) shows high NPL, avg.
 PD (perf.) and forbearance ratios, resulting form the high share of development for sale projects, which account for 32.3%

Stage 2 (perf.) 2025	31.2%	31.8%	
Stage 2 (peri.) 2023			

- After significant growth in the years 2023 and 2024, subcategory C (commercial RE) showed a downward trend in the first half of 2025
- NPL and forbearance ratios in sub-category C are high, but remain below the ratios of sub-category B, which is, among other factors, due to a lower share of development for sale projects of 8.1%
- Category "Other" includes loans that can not be allocated unambiguously to categories A, B, or C

Risks of projects in the construction phase are subject to special monitoring

- 52.6% of NPLs or EUR 412 mn in the RE segment are development for sales projects, of which ca. 51% are completed
- 50.1% or EUR 206.7 mn of the development for sales projects are attributable to Volksbank Wien, 27.7% or EUR 114.3 mn to Volksbank Niederösterreich
- In total, the stock of NPLs in the "under construction" and "financings for land" parts of the RE segment amount to EUR 237.0 mn (of which EUR 201.7 mn are attributable to development for sale projects), 67% (EUR 103.2 mn) are attributable to Volksbank Wien and 24.4% (EUR 37.6 mn) to Volksbank Niederösterreich

Regional distribution by federal states¹⁾ Real Estate segment

- The Real Estate portfolio is concentrated in Austria (ca. 95%), the remaining portfolio is mainly in Germany²⁾ (Volksbank Oberösterreich)
- Sub-category A is a low-default portfolio which consists predominantly of loans for social housing, primarily in the federal states of Vienna, Lower Austria and Styria (rest of sub-category A: mainly owner/developer schemes)
- Sub-categories B and C: traditional commercial real estate financings for residential properties (multi-residential buildings in particular) and commercially used properties
 (including a broadly diversified real estate portfolio of offices, commercial properties, retail properties, etc.)
